ABOUT ME

I am a **full-stack developer** with a strong inclination towards **frontend development**. I focus on creating practical solutions based on user needs.

I am passionate about my work and enjoy team collaboration. Additionally, I have a strong interest in design and illustration.

EXPERIENCES

-Rootstrap - Frontend Engineer (2021-2024) *Occupational*

- Worked on client's project **Grocially.co**, as well as various other Rootstrap projects, utilizing **maps**, **AI integration**, and **microservices**. Specialized in a wide range of React libraries and developed full-stack expertise with NodeJS.

-Teaching Mentor - Learning React Camp (2023-2024)

React Rootstrap Learning Bootcamp

- **Mentored** students throughout the entire bootcamp duration, from beginning to end, providing live support.
- **Taught** and **assisted** in the resolution of theoretical and practical **ReactJS** exercises via Slack.

-Scrum.io (2021) *Academic*

- Implementation of a **Scrum Management System** and complementary tools: **Poker Planning**, a live **Chat** room (socket.io), live **Meetings** (Jitsi), detailed **profile** information, a **calendar** and a variety of statistical **graphs** (charts.js, moment.js)
